

Certified Interventional Procedure Coder - Professional & Facility

About Us

We are a boutique coding and auditing firm specializing in healthcare revenue cycle optimization. Our team of expert coders delivers high-quality services to healthcare providers across the country. As we continue to expand our client base, we're seeking specialized coders with expertise in interventional procedures across both professional fee and facility coding environments.

Role Overview

As a Certified Interventional Procedure Coder, you'll provide accurate and compliant coding for complex interventional procedures in both professional fee and facility settings. You'll leverage your specialized knowledge to ensure proper code assignment for interventional radiology, cardiology, vascular, and other procedural services while maintaining high productivity and quality standards.

Key Responsibilities

- Review and analyze clinical documentation for interventional procedures to determine appropriate code assignment
- Assign accurate CPT, HCPCS, ICD-10-CM, and ICD-10-PCS codes for interventional procedures
- Code across both professional and facility settings with a comprehensive understanding of documentation requirements for each
- Apply in-depth knowledge of interventional coding guidelines, CCI edits, and payer-specific requirements

- Identify and clarify documentation gaps through appropriate physician queries
- Ensure compliance with regulatory requirements and coding guidelines
- Meet productivity and quality standards
- Stay current with coding updates, guideline changes, and industry best practices
- Participate in regular quality reviews and educational sessions

Qualifications

- Current coding certification (CPC, CCS, CIRCC, or equivalent)
- Minimum of 3 years of experience in interventional procedure coding
- Demonstrated expertise in both professional fee and facility coding methodologies
- Strong knowledge of vascular, cardiac, and radiological interventional procedures
- Proficiency with CPT, HCPCS, ICD-10-CM, and ICD-10-PCS coding systems
- Experience with encoder software and coding references
- Excellent attention to detail and analytical skills
- Strong time management abilities with proven capacity to meet deadlines

Preferred Qualifications

- CIRCC (Certified Interventional Radiology Cardiovascular Coder) certification
- Experience with multiple specialties (IR, cardiac cath, peripheral vascular, neuro-interventional)
- Background in coding auditing or education
- Experience working remotely
- Knowledge of charge capture processes for interventional departments

Compensation & Benefits

- Competitive compensation based on experience and credentials
- Flexible work arrangements
- Access to continuing education resources
- Opportunity to grow with our expanding company

This position is ideal for specialized coders seeking to apply their interventional procedure expertise in a dynamic environment. If you excel at complex procedural coding across both professional and facility settings and want to be part of a quality-focused team, we encourage you to apply.
